1

Agenda

- 1. World of VUCA & Digital Transformation**
- 2. Collaboration & Knowledge Sharing**
- 3. Community of Practice**
- 4. Digital Collaboration System: Architecture**
- 5. Presence Model of Knowledge Sharing**
- 6. Example: QUBE by Pentacle**

VUCA

KMC

V = Volatilità

- Imprese Fortune 500 del 2000: Oltre il 50% non esiste più!
- Flessibilità

U = Incertezza

- I dati raccolti ieri ed oggi (su ciò che è già accaduto), non aiutano più a prevedere il domani
- Prepararsi al «worst case» e al contempo lavorare per il «best case»

C = Complessità

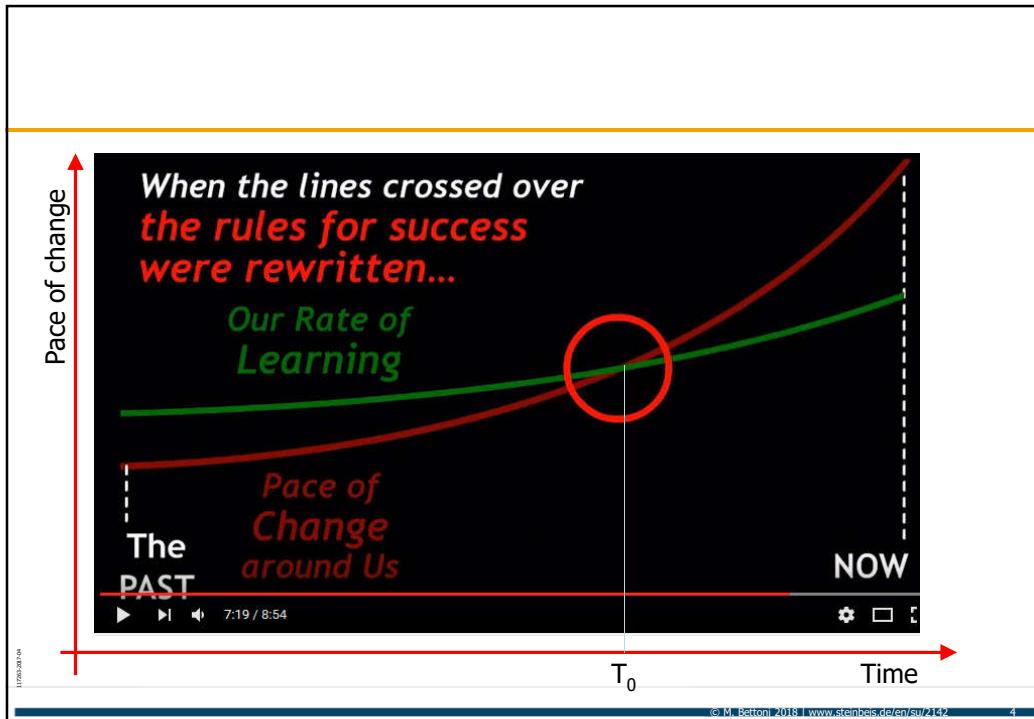

- Molteplicità di elementi e intrecci fra loro
- difficoltà a riconoscere le cause di un effetto
- Agilità

A = Ambiguità

- difficoltà di interpretare i fatti, confusione fra causa ed effetto
- Sesto senso

17/09/2017 04

Collaboration-1 (Cooperation)

- task is **split** into pieces
- each person is **responsible** for one piece
- **shared intentionality** (M. Tomasello)

Collaboration-2 (*)

- task remains a **unit**
- each person is **responsible** for the whole
- **shared knowledge**

NEW practice

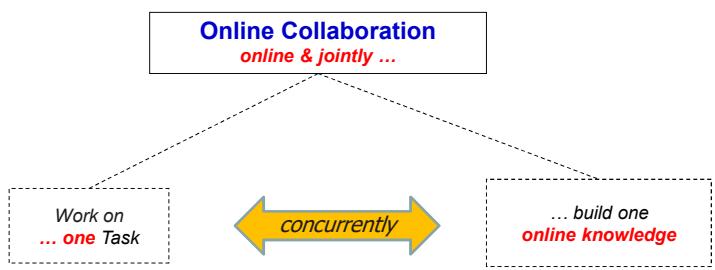

- participants construct and maintain a **shared knowledge structure** as a basis for accomplishing their task

(*) Roschelle & Teasley, 1995

© M. Bettoli | 2018 | www.steinbeis.de/en/su/142 | 5

Digital (Online) Collaboration

adapted from Roschelle & Teasley (1995)

Digital (Online) Collaboration: Interact online to work on a single, shared task. Concurrently, as a basis for this, construct and maintain a shared knowledge structure (SKS). Requires mutual engagement, continuous effort, participative leadership, E-Tools.

© M. Bettoli | 2018 | www.steinbeis.de/en/su/142 | 6

The diagram shows a vertical hierarchy. At the top is a blue triangle labeled "Achieve project's mission". Below it is a green triangle labeled "Working together in a new way". A red bracket groups these two under the heading "Community of Practice (CoP)". At the base is a green trapezoid labeled "Shared knowledge". An orange arrow points from "Shared knowledge" up towards the green triangle.

1. Collaboration based on ...

- Shared Knowledge Structure (SKS)

2. SKS by means of ...

- Mutual Engagement
- Continuous Effort
- Sense of Community
- Negotiation of Meaning

3. Community of Practice success factors ...

- Suitable interactions (design) & competences (members)
- Suitable leadership & organizational culture

Che cos'è?

Si tratta di

- "... persone che condividono un interesse, una passione per qualcosa che fanno ..."

che interagiscono regolarmente

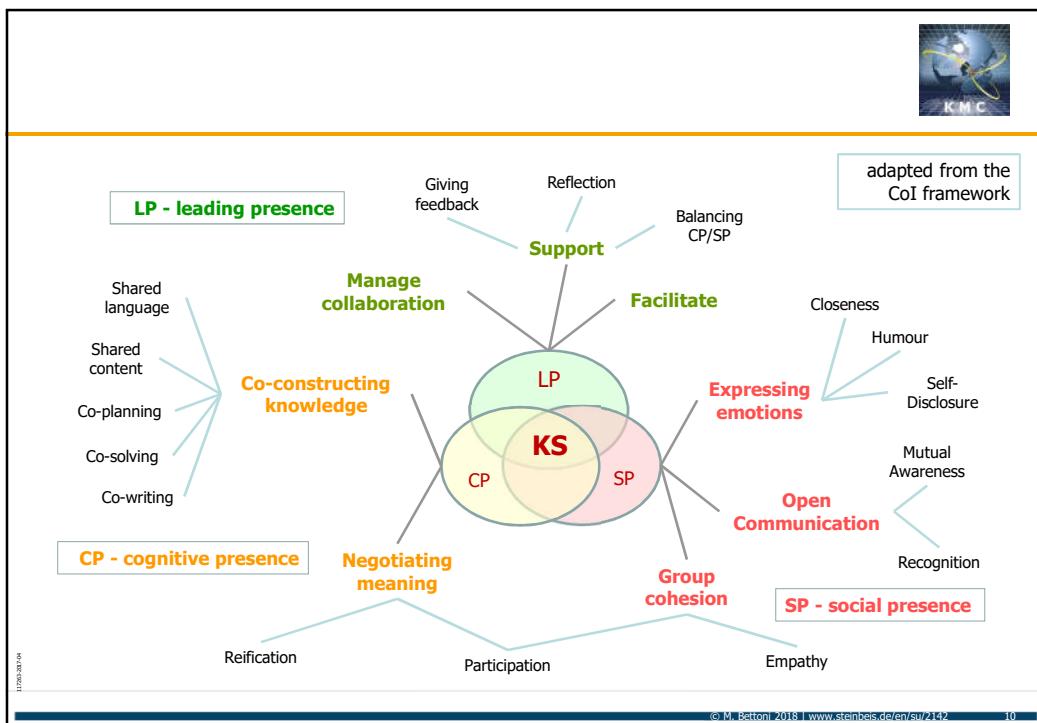

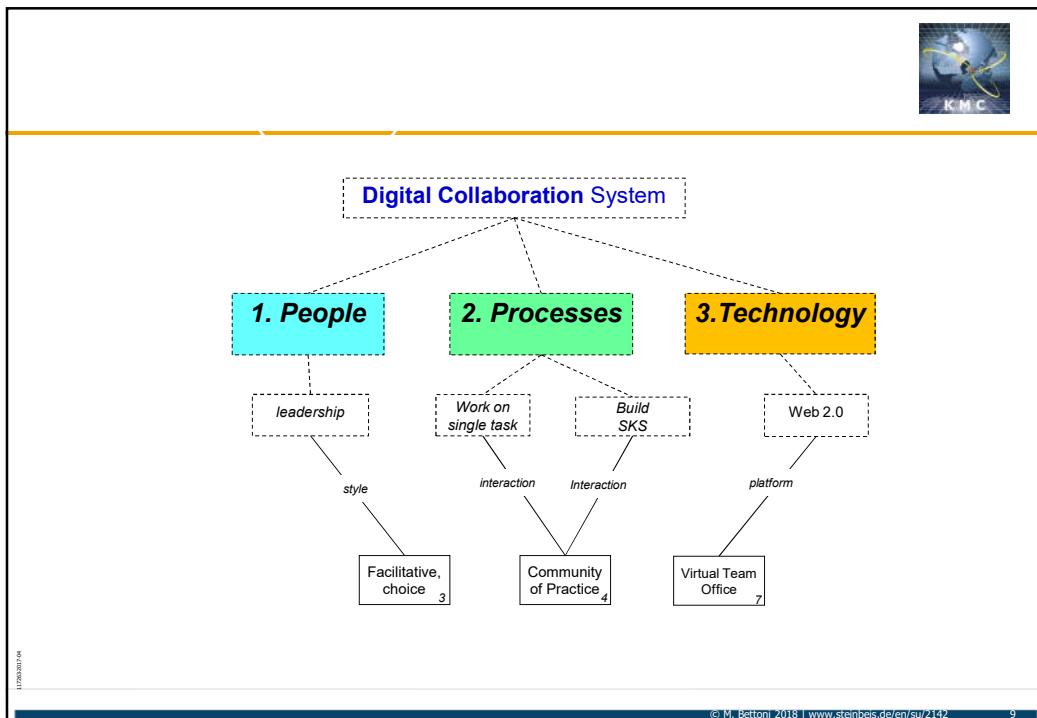

- "... per imparare a fare meglio quello che fanno"

Come si fa ? Sviluppare tre elementi fondamentali:

- **campo tematico:** un'area di sapere, su cui i membri della CoP hanno una competenza che intendono condividere.
- **comunità:** i rapporti sociali fra le persone, soprattutto aiuto reciproco, condivisione del sapere, delle informazioni (alimentati da attività comuni ai suoi membri e un dialogo tra di essi), senso di appartenenza, fiducia.
- **pratica:** il sapere pratico, ossia esperienze, strumenti, tecniche, metodi etc. della propria professione.

QUBE by Pentacle (UK)

QUBE enables to ...

- 1. Work on **one** task
- 2. Build **one** shared knowledge

NEW COLLABORATION

... by means of appropriate interaction design

- collaborative methods (**PET** = performance enhancing tool)
- interacting in **space**: *avatars, movements, objects*
- **convergent** internet technology (users converge in one place)

... thus making digital (online) collaboration more efficient and effective

Conclusion

DIGITAL TRANSFORMATION

- ... requires Digital (online) Collaboration for better exploiting its potential

1st Requirement: understand, recognize & support the emerging NEW COLLABORATION

- Task is not split  knowledge must be shared => shared knowledge structure (SKS)
- Knowledge is not split  mutual engagement, continuous effort, sense of community

2nd Requirement: organize employees as a Community of Practice

- Enables to share (tacit) knowledge in an optimal way
- Requires suitable interactions, competences, organizational culture, leadership

3rd Requirement: develop approaches for implementing NEW COLLABORATION

- Architecture of an E-Collaboration System: People, Processes, Technology
- Presence model of Knowledge Sharing: cognitive, social & leading presence

QUBE fulfills these requirements: <http://qube.cc/>
